- Strong verbal communication, written presentation and report-writing skills are essential.
- Plans, directs and co-ordinates activities of assigned project(s) to ensure project goals or objectives are accomplished within approved timeframe, scope and budget. Independently and effectively manages assigned projects.
- Possesses a solid knowledge of project control, financial reporting, budgeting and process development, plus experience of risk management and understanding of Earned Value Management.
- Possess an understanding of common project management methodologies and experience with implementing projects using PMF/ SDLC.
- Possesses experience in Business Process Improvement.
- Manage relationships, communications and connects on a regular basis with business leaders, business partners/ sponsors, internal and external partners.
- Facilitates relationship with third parties and vendors to meet project deliverables.
- Must be able to work outside of regular working hours.
- Must possess the following skills:
 - excellent organisational and leadership skills
 - excellent problem-solving skills
 - the ability to understand complex information and work out requirements
 - a methodical and structured approach to projects
 - excellent written and spoken communication skills

- excellent IT skills
- a flexible approach to work
- a good understanding of business demands
- the ability to work effectively with other professionals
- the ability to work within budget limits
- excellent time management and the ability to meet deadlines.
- Adherence to the principles of ethics and integrity

Desired Education (Combination or All)

- Degree in Information Technology or Computer Science
- Master of Science in Computer Science or Project Management
- Project Management Professional (PMP) Certification or related certification (PMPRM, SCRUM...)
- ITIL Certification
